

## Bye Bye Pimples—10% BP LOTION

Treatment for Pimples

For Pustular and Inflamed acne

Size: 60ml plastic bottle w/flip cap

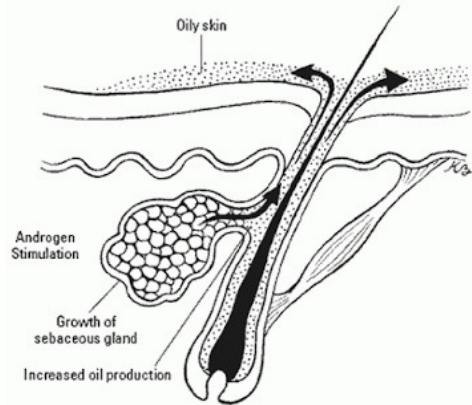

### DESCRIPTION:

A pharmaceutical grade acne treatment. pH balanced.

### ACTIONS: HOW IT WORKS

For over 40 years, benzoyl peroxide has been one of the most effective topical treatment for acne. However, most traditional benzoyl peroxide formulas contain benzoyl peroxide molecules that are larger than the average human pore (50 microns). This can lead to decreased efficiency, instability and skin irritations. Our unique BP formulation contains specially milled benzoyl peroxide particles that are less than 10 microns. These small and stable particles allow the product to penetrate the pores more efficiently to eliminate the P. acnes bacteria with less irritation.

*Propionibacteria acnes*, or P.acnes, are the bacteria responsible for acne breakouts. They cannot live in an aerobic (oxygen-rich) environment. Benzoyl peroxide works by introducing oxygen into the pore, thereby killing P.acnes. When the bacteria population is reduced, the number of breakouts on the skin is reduced as well. Another factor that makes this treatment cleanser so effective is its ability to help rid the follicle of excess dead skin cells. Clearing the pore of cellular debris will lessen the chance of pore blockages or comedones (blackheads). So, Benzoyl peroxide helps prevent skin breakouts before they even start. One application of 10% BP kills 80% of P.acnes. Must be used consistently for 3 months for total clearing.

### Active Ingredients

**Benzoyl Peroxide 10% w/w**

### DIRECTIONS FOR USE:

1. Start with one application per day, or as directed by your skin care professional. Use only at night. Spread thin layer to entire breakout area. Use alone.
2. For sensitive skins use three (3) times weekly only or less and only at night.
3. For maintenance cut back to once a week only at night.
4. Do not use without a sunscreen during the day. We recommend the Z PLUS SPF 45 Sunscreen.

### CAUTION:

- \* Benzoyl Peroxide will bleach linen and clothes.
- \* Avoid touching or applying near sensitive areas like eyes, neck ,etc.
- \* Wash hands after application.
- \* Cleanse skin in the morning. Use a sun protection during day.
