

Pumice Cleanser

Treatment for Blackheads

Comedonal and Non-Inflamed acne

pH 5.5

Size: 120ml plastic bottle w/flip cap

DESCRIPTION:

A pharmaceutical grade acne treatment. This pH balanced liquid formula cleanser contains 2.5% benzoyl peroxide acne treatment. Its pharmaceutical grade, pH balanced, fragrance-free and dye-free. Its effective but wont cause excessive dryness or irritation.

ACTIONS: HOW IT WORKS

Propionibacteria acnes, or P.acnes, are the bacteria responsible for acne breakouts. They cannot live in an aerobic (oxygen-rich) environment. Benzoyl peroxide works by introducing oxygen into the pore, thereby killing P.acnes. When the bacteria population is reduced, the number of breakouts on the skin is reduced as well. Another factor that makes this treatment cleanser so effective is its ability to help rid the follicle of excess dead skin cells. Clearing the pore of cellular debris will lessen the chance of pore blockages or comedones (blackheads). So, Benzoyl peroxide helps prevent skin breakouts before they even start. This product contains a pumice granule to aid effective penetration of Benzoyl peroxide into the follicle or pores where blackheads or comedones are a problem.

Active Ingredients

2.5% Benzoyl Peroxide

Polyethylene Beads

White Oak Bark Extract

Panthenol

Allantoin

DIRECTIONS FOR USE:

1. Wet hands and face. work a small amount of cleanser onto the skin where blackheads or breakouts are a problem.
2. Massage with circular movements for at least 30 seconds, avoiding the eye area or sensitive areas out.
3. Leave on for another 2 to 5 minutes. A tingling sensation may be felt, this will subside when rinsed off.
4. Rinse thoroughly.
5. Use once or twice a day as directed by physician or skin therapist.
6. Patients with slight breakouts can use this 2 –3 times a week—once a day.
